

PhD in Physics/Astrophysics
The Catholic University of America
Washington DC - USA
<http://physics.cua.edu/>

The Department of Physics at The Catholic University of America is offering Graduate Assistantships for the Fall 2011. Potential Research Topics include: Astrophysics, Nuclear Physics, Biophysics, Materials Sciences, Vitreous State Physics and Condensed Matter. The Physics Department hosts the Institute for Astrophysics and Computational Sciences that has more than 30 astrophysicists and solar physicists associated with the Goddard Space Flight Center at NASA. In addition, arrangements can be made for cooperative research projects in other nearby governmental laboratories such as the Naval Research Laboratory, and the National Institute of Standards and Technology.

The candidates should have a bachelor's degree in Physics or Astronomy and show proficiency in English. Candidates are selected based on the TOEFL, GRE (general), three letters of recommendation and GPA. The Catholic University of America is located in Washington, DC. Applicants should email their CV to Dr. Duilia de Mello (demello@cua.edu) for more information.

Dr. Duilia de Mello is visiting PUC/Santiago until 07/14 and can provide more information to anyone interested. She is staying in Dr. Gaspar Galaz office.
