

Dear colleagues,

With this circular, we would like to draw your attention to three open PhD student positions in the MHD Group at the Astrophysical Institute of Potsdam (AIP). The institute focuses on the fields of cosmic magnetic fields and extragalactic astrophysics in general and has about 150 employees. The topics offered here deal with magnetohydrodynamic simulations of astrophysical phenomena.

Topics and contact persons are

- DYNAMO ACTION IN PLANETESIMALS, Rainer Arlt (rarlt@aip.de)
together with Goettingen University
- DYNAMO MODELS OF GALAXIES WITH WIND,
Detlef Elstner (delstner@aip.de)
- INTERACTION OF SUPERNOVA REMNANTS WITH INTERSTELLAR CLOUDS,
Udo Ziegler (uziegler@aip.de)

We would be grateful if you can spread the information at your institution.

The student will enjoy the beautiful area of Potsdam and Babelsberg and benefit from the proximity to Berlin. The successful student will obtain a PhD from the University of Potsdam. Applications should contain a CV, graduation documents and one or two addresses of references. The offer is valid until the positions are filled.

With best regards,
Rainer Arlt
